7. Did your dog come from a shelter? Yes \_\_\_ No \_\_\_ If yes, did your dog have a behavior evaluation while at the shelter? Yes \_\_\_ No \_\_\_

8. AKC Defines reactivity in a dog in the following way: Reactivity is commonly confused with aggression. Dogs that are reactive are those that overreact to certain things or situations. Genetics, lack of proper socialization, or a combination of the two can cause reactivity, and fear is typically the driving force. Reactive dogs may have certain triggers, such as men with beards or hats, small children, or situations when the dog feels trapped by being on a leash. Would you describe your dog as reactive? Yes \_\_\_ No \_\_\_ Not Sure \_\_\_

9. Please check off any of the following that may trigger reactivity in your dog:

Other Dogs \_\_\_ Strangers \_\_\_ Sounds \_\_\_ Objects \_\_\_ Certain Locations \_\_\_

Does not apply to my dog \_\_\_

Other \_\_\_\_\_
